

Training Your Touch 2: Following the Fascia

Welcome to the next step in refining your assessment skills! First, you will practice evaluating the nervous system and fascial network at various locations to identify stress or dysfunction. Then you will explore key osteopathic concepts that can be applied to both assessment and treatment.

On the second day, you will identify and resolve tension patterns and fascial pulls throughout the body. This class will enhance your skill in any method of bodywork.

Have FUN meeting your CE requirement!
